

AMENDMENT TO THE CLAIMS

This listing of the claims replaces all prior listings of the claims.

Listing of the Claims:

1-21. (Cancelled).

22. (Currently Amended) A system for displaying information about an insurance claim for an insured event, the system comprising:

a server component including an event processor, a task engine application program that interacts with ~~an~~ the event processor to enable said insurance claim to be processed;

a data component residing on the server component, wherein the data component comprises a claim folder that decomposes a claim related to the insured event into a plurality of levels, wherein the plurality of levels includes a policy level, a claim level, a participant level and a line level, wherein the server component is configured to generate a user interface for interactively displaying at least one of the plurality of levels reflecting information related to a policy, the claim, claimants and an insured person in a structured format to a plurality of users simultaneously; and

wherein the event processor interacts with the data component to identify data events generated that affect data in the claim folder, identify an appropriate system component to enable said claim to be processed and transmit a data event to the identified system component to automatically generate a list of actions to be taken by ~~an individual~~ one of the plurality of users processing said insurance claim to enable said insurance claim to be processed.

23-40. (Cancelled).

41. (Previously Presented) The system of Claim 22 wherein the server component displays policy level information comprising information related to covered autos for auto claims, information related to covered property for property claims and information related to covered yachts for marine claims.

42. (Previously Presented) The system of Claim 22 wherein the server component displays claim level information comprising details information, facts of loss information, events information and liability information.

43. (Previously Presented) The system of Claim 22 wherein the server component displays participant level information comprising details information and contact information, information related to the insured event, injury information and disability management information.

44. (Previously Presented) The system of Claim 22 wherein the server component displays line level information comprising information related to damaged vehicles for vehicle lines, information related to damaged property for property lines and information related to damaged yachts for marine lines, and information related to the insured events, damages and negotiation associated with the vehicles, property and yachts.

45. (Previously Presented) The system of Claim 22, wherein the server component displays claim level information comprising details information, facts of loss information, events information and liability information.

46. (Currently amended) The system of Claim 22 wherein the ~~participant level comprises~~ server component displays participant level information comprising information related to persons involved in the claim, information related to the role of persons in the claim and contact information of the persons.

47. (Previously Presented) The system of Claim 22 wherein the line level comprises a user interface enabling the capture of negotiation information.

48. (Currently amended) The system of Claim 22 further comprising a client component in communication with the server component, wherein the client component is configured to provide information concerning an individual in the

insured event and for allowing one of the plurality of users ~~user~~ to link the individual to the insured event.

49. (Previously Presented) The system of Claim 48 wherein the client component is configured to display the user interface as a response to the communication with the server component.

50. (Currently amended) The system of Claim 49 wherein the client component is configured to allow ~~the user~~ one of the plurality of users to edit information associated with the plurality of levels.

51. (Currently amended) The system of Claim 49 wherein the data component is configured to allow ~~the user~~ one of the plurality of users to search for information associated with one of the policy level, the claim level, the participant level and the line level.

52. (Previously Presented) The system of Claim 22 wherein the server component displays participant level information comprising a category of historical information, a claim index and contact information.

53. (Previously Presented) The system of Claim 22 wherein the server component displays policy level information comprising information on the claimants that are injured with disabilities.

54. (Previously Presented) The system of Claim 22 wherein the server component displays policy level information comprising specific information on injuries suffered by the claimants.

55. (Previously Presented) The system of Claim 54 further comprising a statistical model for claim practices and risk selection that uses the specific

information on injuries suffered by the claimants, said specific information being stored in claims folders and accessible by said server component.

56. (Previously Presented) The system of Claim 54 wherein the specific information is represented by ICD-9 code.

57. (Previously Presented) The system of Claim 22 further comprising a client component in communication with said server component, said client component displaying a claim tree associated with said policy.

58. (Previously Presented) The system of Claim 57 wherein said claim tree lists said policy, said insured person, claimants and related lines in a claim tree format.

59. (Previously Presented) The system of Claim 57 wherein said client component further displays claim level tabs.

60. (Previously Presented) The system of Claim 57 wherein said claim folder displayed on a client component can be changed between a view mode and an edit mode.

61. (Previously Presented) The system of Claim 60 further comprising menu options displayed on said client components, wherein said menu options depend upon whether said claim folder is in said view mode or said edit mode.

62. (Previously Presented) The system of Claim 22 wherein said event processor further provides a task due date for each task of said list of tasks.

63. (Previously Presented) The system of Claim 22 wherein said event processor further records tasks completed for every claim.

64. (Previously Presented) The system of Claim 22 wherein said event processor generates a historical record for any task which is determined to be completed related to the processing of said claim.

65. (New) The system of claim 57 wherein the client component uses an optimistic locking mechanism when the claim tree is displayed to the plurality of users simultaneously.
